*For immediate release: May 16, 2004*

### **Tavros Completes Another Wifi Network!**

Austin Texas-

Tavros Networks, Inc announces the installation of a new regional wireless network in Asia. "Asia is one of the faster growing regions in the world and will use the new wireless "WiFi" network for such needs as distance learning and education for the children," said Tavros Networks' Director of Operations, Lashley Banks. "Not only will Tavros continue to supply customers with the highest-quality international networks, it has added an essential ingredient, more direct connectivity within Asian countries, in order to offer a better value, and to maintain its own competitive advantage."

Tavros is one of the larger enhanced service providers, based in the US and Asia, dedicated to building networks for carrying voice and data on behalf of other enterprises, governments and carriers. Tavros has changed the economics of international network services by building and operating networks, which deliver high quality enhanced data and voice services, over the Internet, to and from countries around the world. This includes metro, fiber optic, WiFi, WIMAX, fiber optic LANS, and long haul networks.

#### *About Tavros Networks, Inc.:*

Tavros Networks, Inc. (TNI) is a US based International Network Service Provider that builds international data networks for the world's International Carrier Industry. Today, Tavros Networks, Inc. maintains its headquarters in the US, as well as contact offices in Hong Kong.

#### *Forward-looking Statements:*

Tavros has included in this press release certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. "Forward-looking statements" consist of all non-historical information and include the analysis of historical data in this release. Actual results could differ materially from those projected in the Company's forward-looking statements due to numerous known and unknown risks and uncertainties including, among other things, unanticipated technological difficulties, the volatile and competitive environment for Internet telephony, changes in domestic and foreign economic, market, and regulatory conditions, the creditworthiness of our customers, uncertainty in legal proceedings and other considerations.
